BUYER BRAIN

Health

A uniquely Indian perspective: Cognitive Polyphasia

The simultaneous existence and comfort level with diverse, sometimes contradictory thinking modes and knowledge systems within individuals or groups.

In Indian Healthcare: Manifests as a seamless blend of traditional and modern health approaches.

Health consciousness levels and intent high

Behaviours are moderate

Only 16% people follow intense activities (cardio, gym above 1 hour, at least 3 times a week)

Health

Behavioural Science Foundations
Prevailing Underlying Heuristics

The Ostrich Effect

The tendency to ignore &/or avoid negative information or unpleasant situations

Avoidance of health screenings

The Normalcy Bias

The belief, things will continue as they have in the past thus, underestimating potential threats

Downplaying early symptoms of chronic illnesses

The Illusion of Competence

When we overestimate our knowledge or abilities

Do not somebody tell me, how to keep fit and healthy

The Dunning Kruger Effect

Individuals with low ability at a task overestimate their ability

Self- diagnosis

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

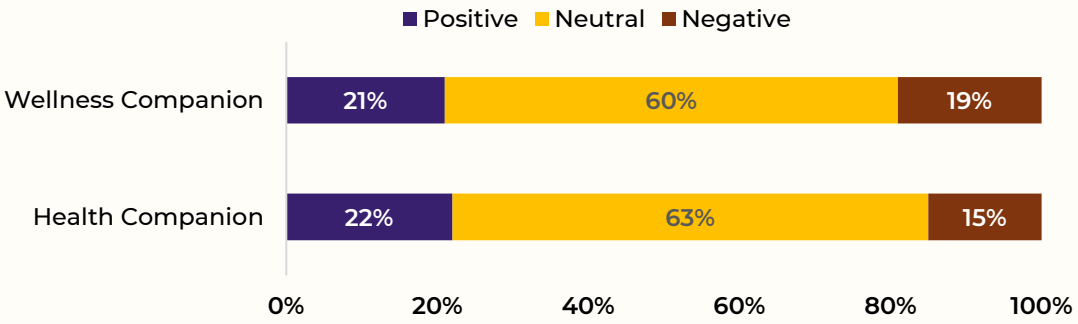

On Health Insurance

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

Health Insurance

The health side of health insurance
Which is which?

Weak association with “Health” & “Wellness”

Idea of Insurance brands providing “health” facilitation beyond diagnosis & treatment welcome

Low awareness of which brands facilitate “health”

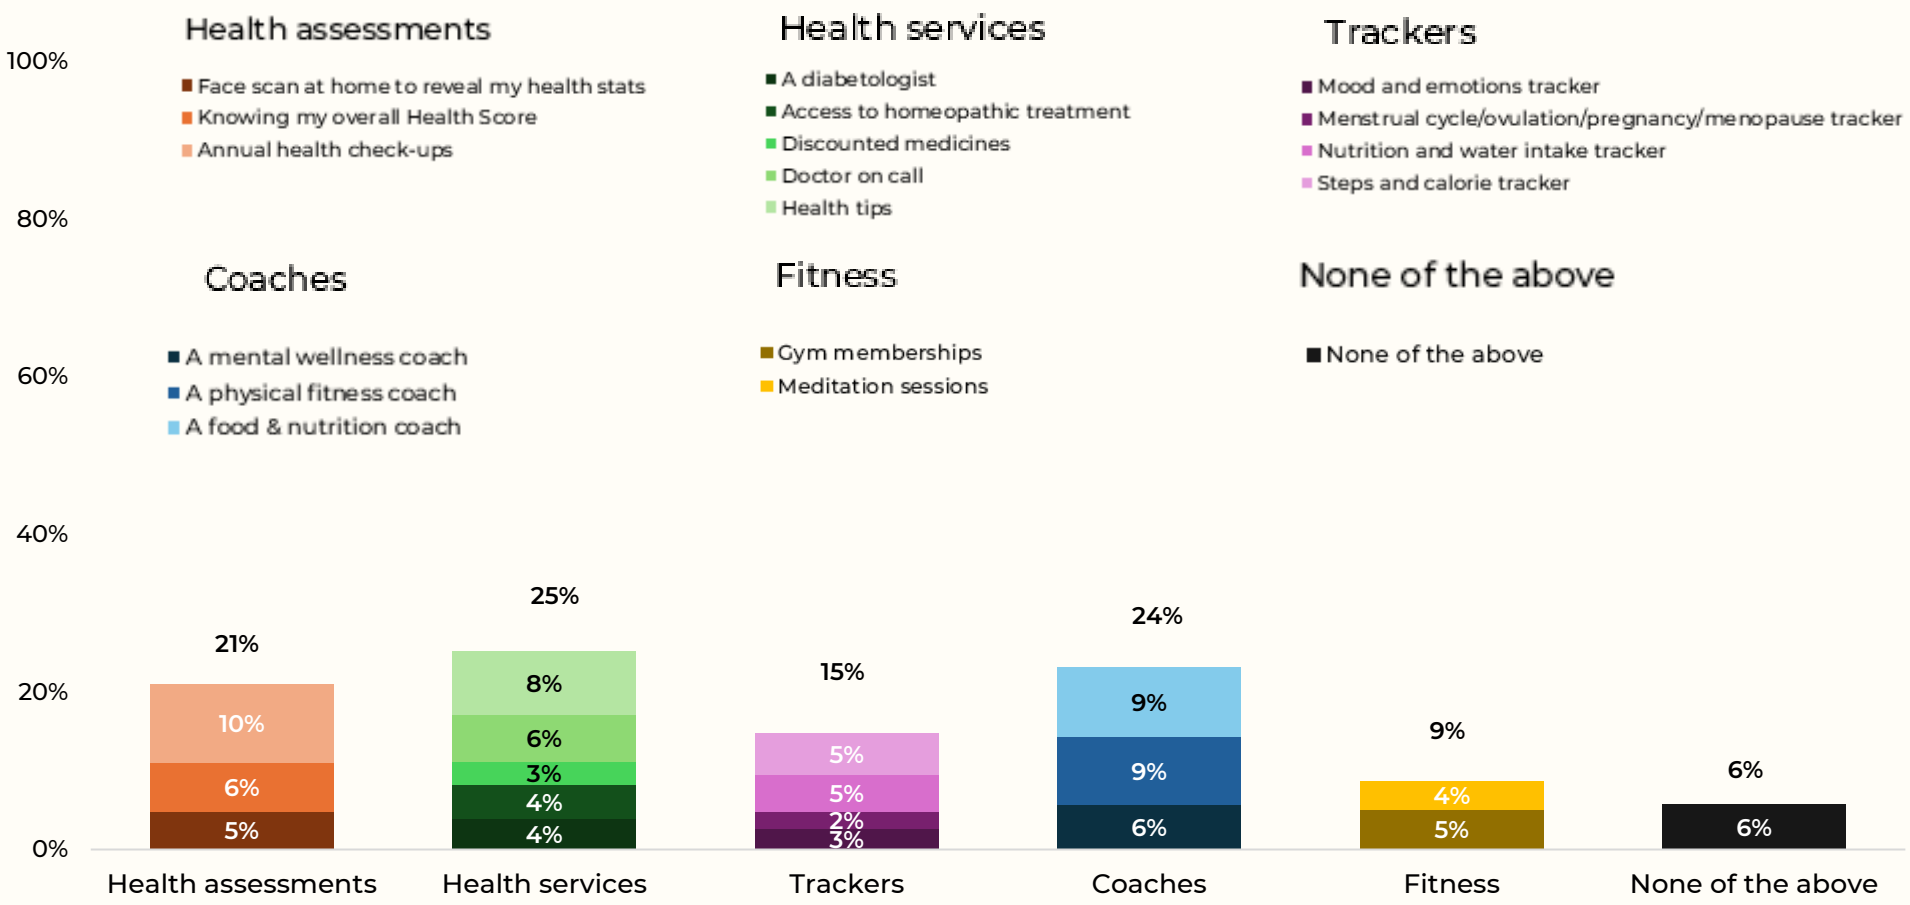

"There's nothing substantial to go in for the app. There are no like, as you said, there are no advisors or there are no suggestions how to keep your, keep your health intact or, you know, what are your, there are no, what you can say, there are no value add."

Respondents across ABHI, NIVA, CARE, STAR, MANIPAL
n~1900

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

Health Insurance

The health side of health insurance ~ The awareness chasm

"I look at it as like a cashback. You are getting a 30% cashback. We have a mentality of 'Kitna deti hai?' What's the average?."

"Haven't checked different facilities on the app. Hope to consult the agent to know more. But am currently too tied up to make the time to meet the agent".

"One nice lady, she called and explained a few benefits...I don't exactly remember though".

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

Respondents across ABHI, NIVA, CARE, STAR, MANIPAL
n~1900

Health Insurance

The insurance side of health insurance
Asymmetry, Cognitive Friction & Dissonance

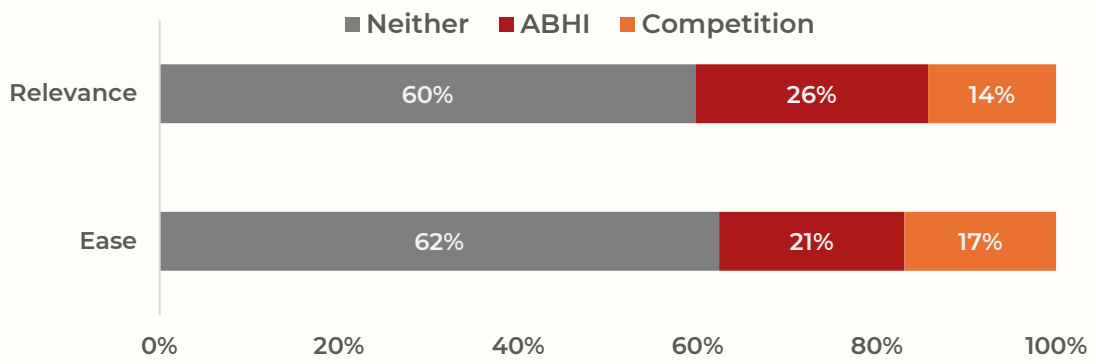

Continues to be perceived as complex

Product choice heavily influenced by recommendations

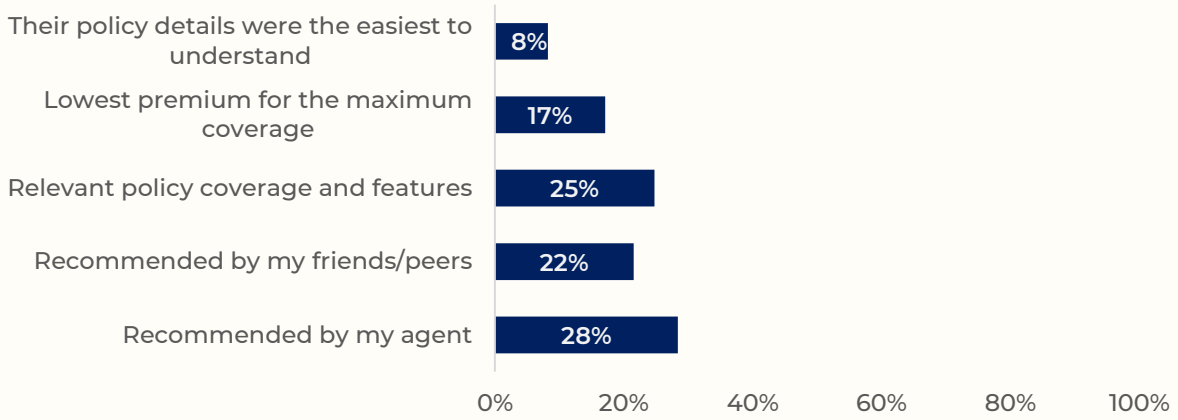

Recommendations from friends & peers nearly as prevalent as that from agents

At **25%**, a significant proportion of respondents seem to evaluate coverage & features (in most cases digitally) before deciding on the brand – This is a significant improvement from sub -15% levels about 18 months ago

"It's just too complex with the riders, the conditions and so many ifs & buts.... I look at the basics, whether what I need is covered & if I can optimise the premium somehow...rest I have neither the time nor the patience.".

Respondents across ABHI, NIVA, CARE, STAR, MANIPAL
n~1900

Respondents across ABHI, NIVA, CARE, STAR, MANIPAL
n~700

Transactional Experience
Where rubber hits the road....

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

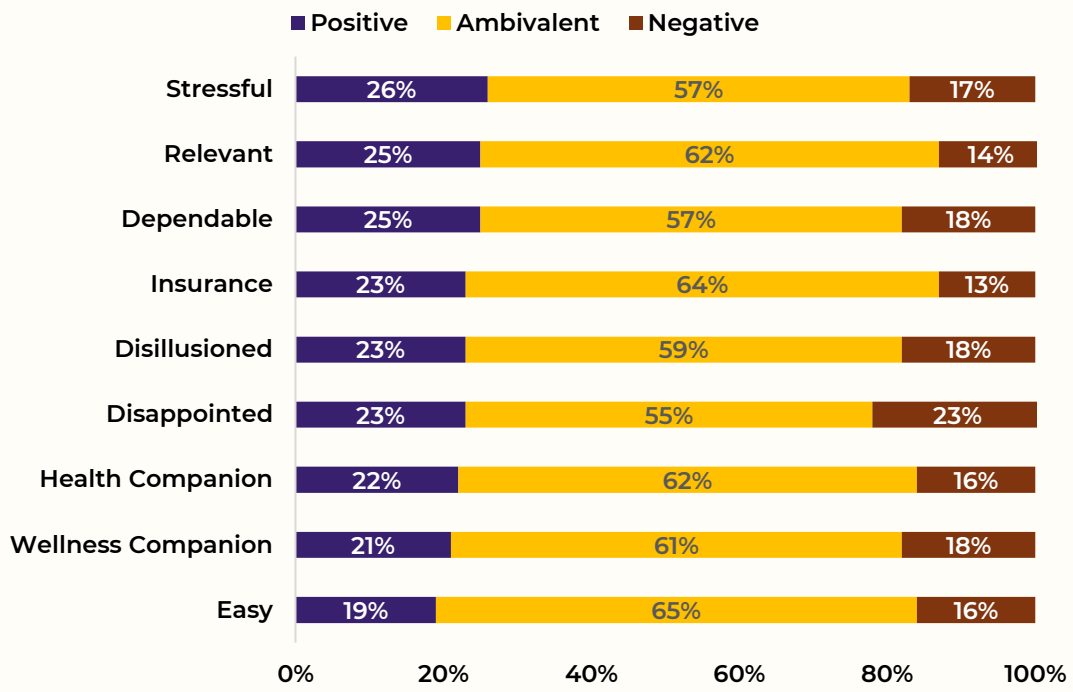

Health Insurance

The insurance side of health insurance - The Trust deficit

Cognitive Effort

Attributes

"They are a reputed brand... so one assumes they will do the relevant checks and verifications... But how do we know as customer....".

Respondents only ABHI
n~900

"You cannot trust everything that is online...It is difficult to know credibility....They should make sure it (advice, content) is authentic ".

Respondents across ABHI, NIVA, CARE, STAR, MANIPAL
n~1900

BUYER BRAIN

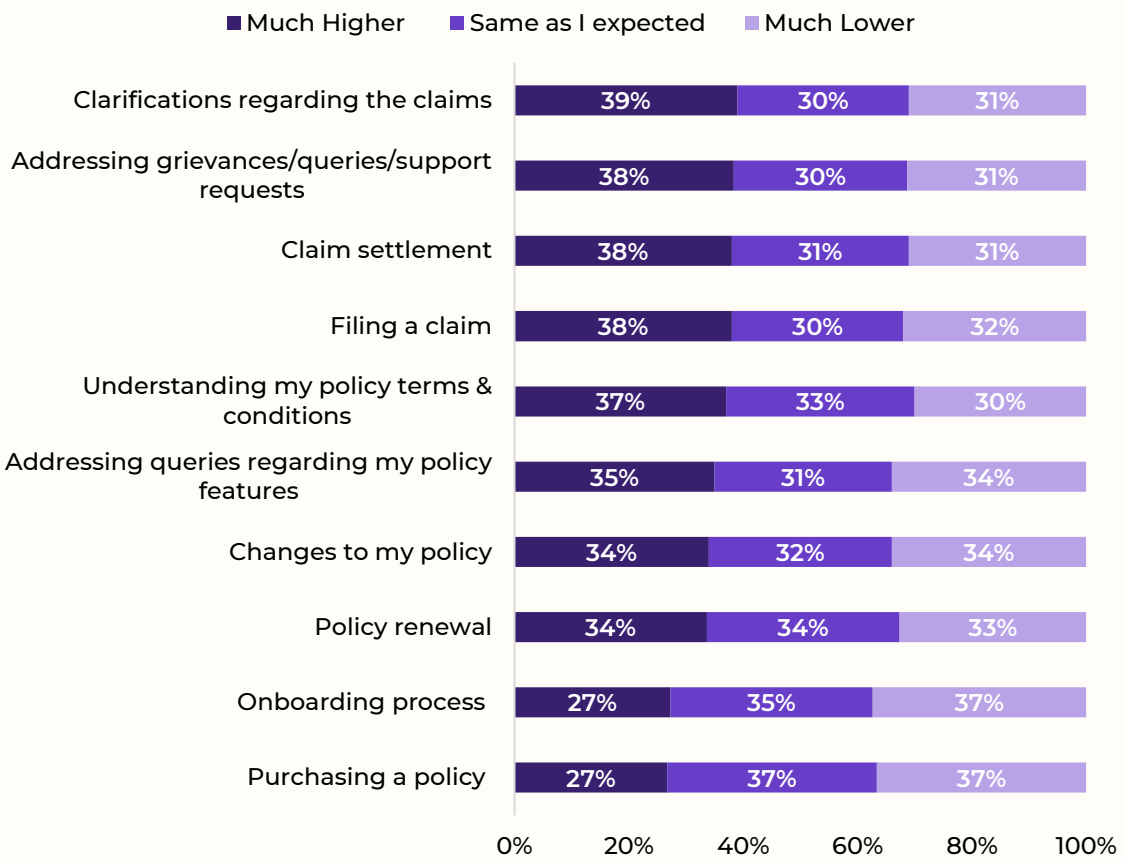

Health Insurance

The insurance side of health insurance – Where is the Ease?

Iterations required

Turn around Time (TAT)

Respondents across ABHI, NIVA, CARE, STAR, MANIPAL
n~700

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

Health Insurance

The insurance side of health insurance

The foundational building block for a sustainable competitive advantage

Transaction experience sees friction, there headroom for enhancing ease of engagement.

This friction has a compounding effect in an already “opaque” category

Friction increases progressively across the engagement lifecycle

ABHI marginally better than the competition in the purchase phase

Care & Star are better at providing clarifications & facilitating changes to the policy. ABHI is perceived to take longer to respond & resolve

Filing claims is perceived to be easier with ABHI

ABHI trails the competition when it comes to claims settlements and providing clarification

Refer Annexure

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

Health Insurance

The insurance side of health insurance –Dissonance needs resolution

Strong, contextual post-purchase experience key to driving word-of-mouth & brand preference

ABHI runs the risk of being perceived as “Sales Focused”

Given the increasing impact of “word-of-mouth” on brand preference, such a perception likely to negatively impact business acquisition.

In categories perceived as “opaque” such as health insurance, peer influencers are a key driver of dissipating cognitive dissonance and decision inertia.

The Blue Ocean

Being “Experienced” and being “Seen” as invested in customer health is an uncharted “blue ocean”.

It’s not just about being “Health First” or “Insurance First”.

The devil is in the details (consistent execution): Crafting each touchpoint and journey towards being:

Trusted, Consistent, Frictionless, Contextual

Health facilitator, to the chosen tribe.

“We are an insurance company whose growth is driven by you staying healthy. Our growth is not driven by denying you what is yours or by relying on fine print.

We are an “uninsurance”, insurance company!”

The Decision Framework

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

Health Insurance

Context Architecture

Perceived usefulness
Functionality as defined by the user

Risk perception (brand/product)
Cognitive Effort complexity, information asymmetry

Cognitive ability to evaluate insurance options (income levels often a surrogate)
Given the perceived and real, category and product complexity, how do I decide?

Value perception
What role do you play in my life goals?

Credibility
Will you be around, till I am? Will you stick to your commitments

Influencers
Social proof, peers

TERRAGNI CONSULTING
the Human Engagement company

Not to be circulated without prior authorisation

BUYER BRAIN

Hierarchy of expectations

Functional

Friction free, on-demand

Helps me save “money”

Helps me access the care I need

Experiential

Makes it convenient for me to manage my health

Is an active partner in my health journey

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

Engagement Pillars

Context of Health

Health incidents inevitable
Treatment cost a key concern

Health incidents preventable
Treatment quality a key concern

Context of Health Insurance

Perceive health events as “money” risk
Insurance addresses money stress

Perceive health events as “wellness” risk
Insurance addresses care (coverage) stress

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

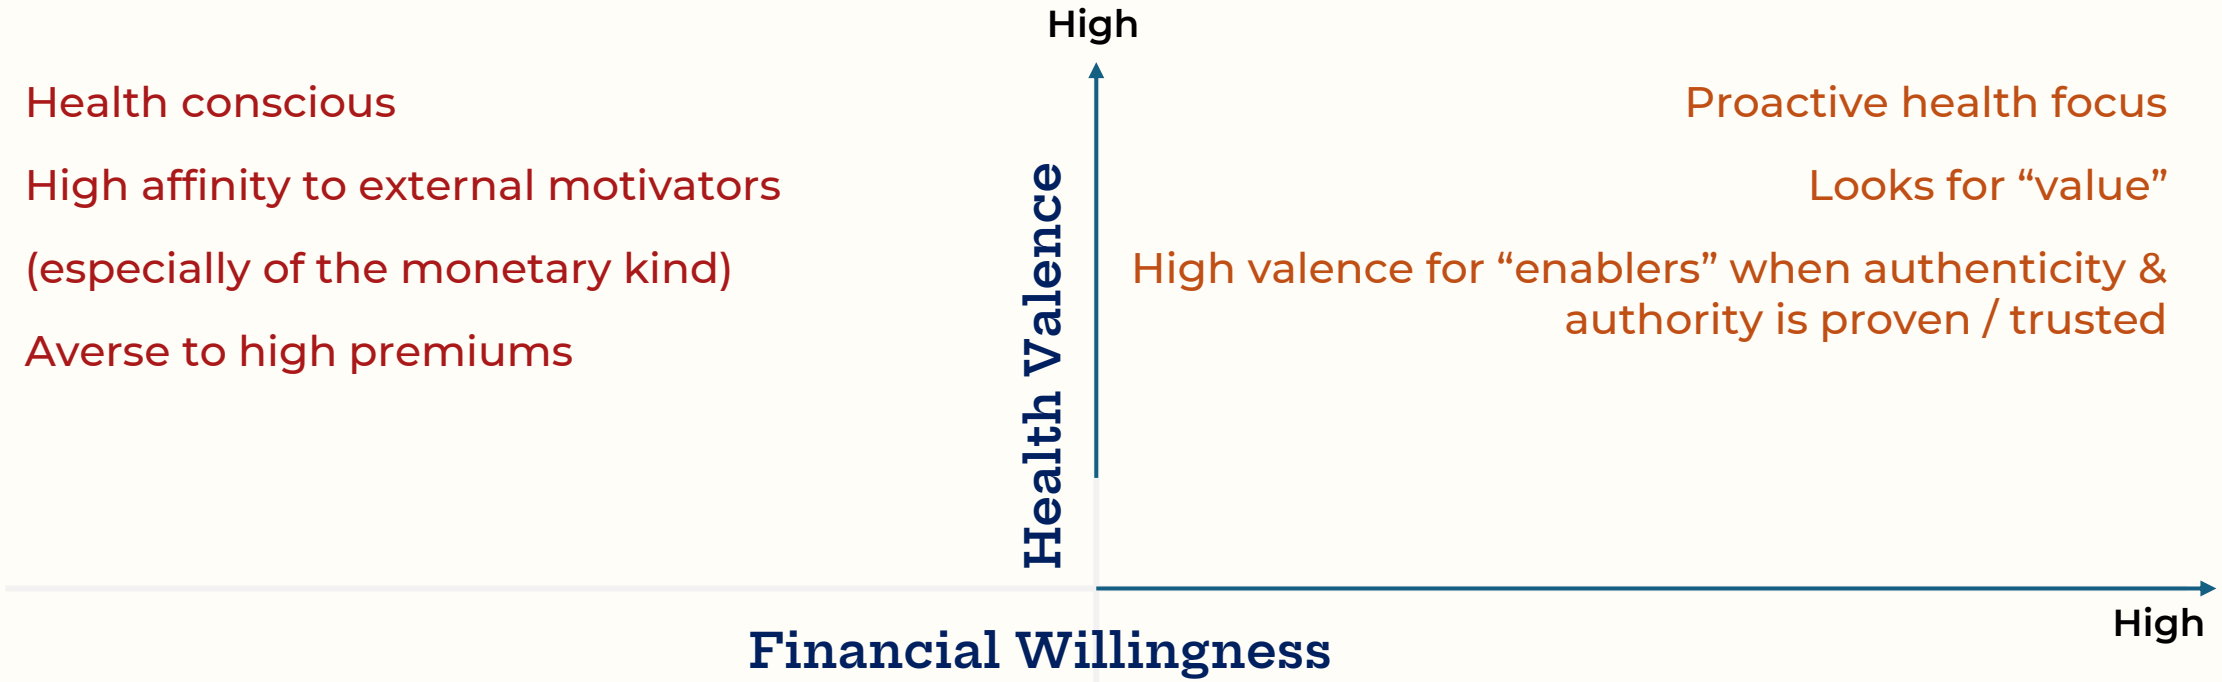

The Experiential Segments

In Search of our Tribe(s)!

© Terragni consulting (P) ltd Private and confidential
Not to be circulated without prior authorisation

Engagement Pillars

Health conscious

High affinity to external motivators

(especially of the monetary kind)

Averse to high premiums

Proactive health focus

Looks for “value”

High valence for “enablers” when authenticity & authority is proven / trusted

Price Sensitive

Looks for “bare essential” coverage

Amenable to the occasional reminders for health tests

Wants more comprehensive coverage

Appreciates commoditized “on-demand” Add-ons

TERRAGNI CONSULTING
the Human Engagement company

Bridging the Trust Gap

Health is a high emotion arousal context for all humans. Survival wiring kicks in.

Trust is a key arbiter to choose partners.

What builds trust

Transparency: Higher when customers see clear, evidence-backed wellness initiatives. Customers are more likely to view insurers as credible if wellness programs are personalized, transparent in purpose, and genuinely aimed at improving health.

Consistency, Repeatability and Engagement: Consistent, no negative surprises engagement.

Healthcare Ally: Insurers historically seen as “financial protectors” rather than “wellness catalysts”.

Social Proof : Likelihood of Trust, increases with positive Peer Social Proof.

Frictionless: Friction in the end-to-end journey causes significant degradation of trust

Field Sales Pocket Reference

1. 60-Second Segment Identifier

✓ Ask these 3 quick questions:
1. "What's your age?"
2. "What matters most about health coverage to you?"
3. "How do you typically approach health issues?"

2. Rapid Classification Matrix

Age Groups Quick Check

```
```

- 25-35 → Likely Sunriser
- 35-60 → Risk Averse or Holistic
- 55-605+ → Likely Sunsetter

```
```

Quick Visual Indicators

SUNRISERS (25-35)

```
```

Look For:
- ✓ Smartphone always in hand
- ✓ Fitness tracker/smartwatch
- ✓ Active social media user
- ✓ Gym bag/athletic wear

Listen For:
- ✓ "My company provides insurance"
- ✓ "I'm healthy, don't need it"
- ✓ "Is it all digital?"
- ✓ "What about tax benefits?"

```
```

RISK AVERSE (35-60)

```
```

Look For:
- ✓ Family photos on phone
- ✓ Conservative dress
- ✓ Calculator/budget app use
- ✓ Family calls during meeting

Accessibility: Investigate

Aditya Birla Health Insurance
Customer Segmentation Guide

TERRAGNI CONSULTING

Listen For:
- ✓ "What about my parents?"
- ✓ "How much coverage?"
- ✓ "What's the claim process?"
- ✓ "Monthly premium cost?"

```
```

HOLISTIC (35-60)

```
```

The Marketing Aircover

SCARF: To bridge the trust deficit & drive decision velocity

Identifies social factors that influence human behaviour. These factors drive our responses to situations, promoting either a threat or a reward response. The model emphasizes that meeting these needs can positively impact motivation

Status	Certainty	Autonomy	Relatedness	Fairness
Transparently designed Tiered "Health Champion" program, linking Bronze, Silver, or Gold badges to not just health actions goals/outcomes but also to interims like check-ups/weigh-ins.	Design a "Health Journey Map" with real-time claim stages, creating progress bars and simple checklists to track steps. This taps into three things, Visibility Recency and Frequency Familiarity Bias-We all are used to Status bars!	Designing a "FlexiHealth" feature, allowing customization of health packages with options like "Mental Health Boost." or "Convert 10k steps to 21 Surya namaskars or top up your policy as you add loved ones to your family	Humans love being part of tribes. Tap into this. Be an active catalyst to foster both online and offline "Health-Parivars" where like minded members join up to grow, worry, share together.	Reward policyholders fairly for consistent health actions with premium discounts. AND demonstrate this fairness (See STEPPS)
Nudge Example: "Just one check-up away from Gold status!" . This taps into competitive and social incentives. Both Sunrisers and Active Sunsetters are prime targets	Nudge Example: "80% complete—just one more input needed!" reduces uncertainty and encourages completion. This would appeal to each of the 3 health centric segments as well as serving as a "curiosity nudge" to the price warriors!	Nudge Example: "You're in control! Choose what best fits your goals" reinforces autonomy, making each segment feel empowered in their decisions.	Nudge Example : The Parivars are backed by visible group progress bars, like say LinkedIn Or Insta to foster social connection and encourage shared goals. The Sun-setters would benefit the most	Nudge Example : "Because you maintained your health actions (please note , NOT using the word goals), enjoy XXX reward!" reinforce fairness and transparency. This would hold cross segment appeal

The Marketing Aircover

STEPPS: To drive virality of the “Health-first” platform

Social Currency	Triggers	Emotion	Public	Practical	Stories

1. Social Currency: make people feel special or in-the-know encourages sharing, as it enhances their social status.
2. Triggers: Specific cues or reminders for top-of-mind recall, prompting discussions and shares.
3. Emotion: evoke strong emotional responses—whether positive or negative.
4. Public: Visibility matters; easily observable and seen
5. Practical Value: Useful and informative , provides practical benefits.
6. Stories: Narratives that engage & are easy to remember enhance shareability

The Marketing Aircover

STEPPS: To drive virality of the “Health-first” platform

Social Currency	Triggers	Emotion	Public	Practical	Stories
Create a “Wellness Achievers” leaderboard for wellness milestones. *Learn from Strava*	Tie content to key time and cultural markers, sending reminders when for example , seasons change—time to start hydrating more !”	Share real customer stories that highlight peace of mind during emergencies or exemplify resilience , mental and physical.	Promote “Health Credits” displayed publicly on the customer dashboard.	“Health Hacks” like “5 Tips for Saving on Medical Bills” or “What is HGH and its co-relation to IF”, or “Why is Magnesium important?”	Animated video stories of relatable characters who use Health First/insurance in creative ways,
Nudge Example: “Share your achievement and inspire others!” Get leaders to do a 10-minute podcast (see Stories) This taps into the drive for social currency by making health accomplishments visible and shareable.	Nudge Example: Using time and event-based triggers helps anchor insurance reviews to timely social cues.	Nudge Example: Emotional nudges such as, “This could be your family’s peace of mind too,” appealing to empathy and a sense of security to create emotional resonance.	Nudge Example: The dashboard is the landing page for the app/website login.	Nudge Example: “Did you know?” messages Practicality nudges encourage people to read, share, and apply useful content.	Nudge Example: “See how [Character] used this benefit in a pinch!” Drawing viewers in with stories encourages them to explore lesser-known features of the ABHI platform/offerings

Frictionless

FOR FRICTIONLESS FUTURES

The Leading Metric to an enhanced NPS and a more accurate, actionable indicator of operational efficiency, loyalty and word of mouth

EAS measures 4 types of Friction:

EAS®

Physical:
When achieving a desired outcome requires customers to take physicaleffort.

Time:
When a customer must go through long waiting periods to achieve an outcome.

Cognitive:
When processes and touchpoints increase the cognitive load of customers.

Perceived:
When customers perceive the amount of friction involved in an outcome to be higher than what it may turn out to be.

Opportunities

ABHI marginally better than the competition in the purchase phase

Care & Star are better at providing clarifications & facilitating changes to the policy. ABHI is perceived to take longer to respond & resolve

Filing claims is perceived to be easier with ABHI

ABHI trails the competition when it comes to claims settlements and providing clarification

ABHI runs the risk of being perceived as “Sales focused”

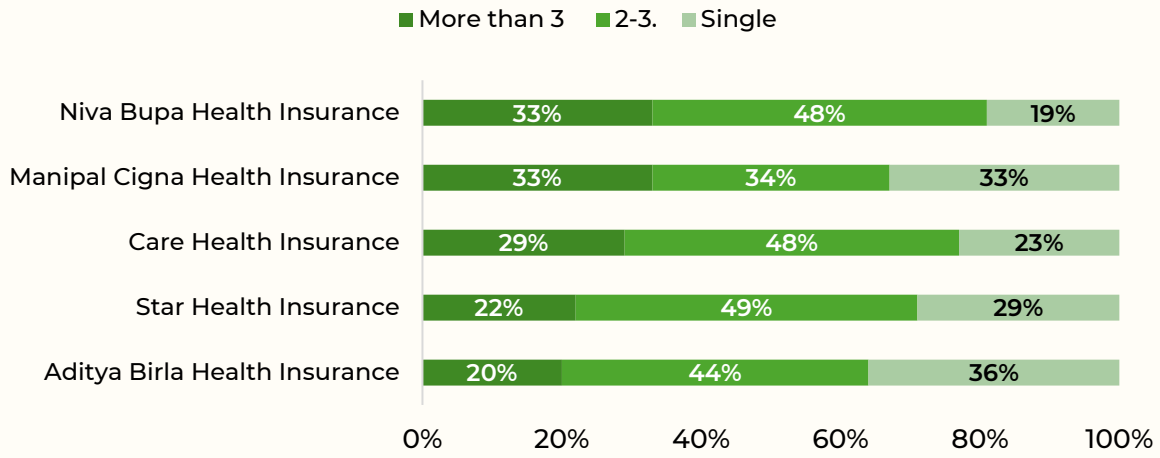

Given the increasing impact of “word-of-mouth” on brand preference, such a perception likely to negatively impact business acquisition
