Business Outcomes

2nd

Largest private bank in India

1600

Branches

15,00,000

Customers Pan India

The bank aimed to grow its privilege banking program by increasing the amount of business it gets from existing customers and by direct acquisition of new customers.

Client Background

Challenge

Objective

What We Did

Opportunities

Segments

Solutions

Samples

Business Outcomes

Increasing dormancy and poor account usage

High percentage of customers were not using paid services

Potential customers did not see any clear reason to sign up for “yet another” privilege banking program

Client Background

Challenge

Objective

What We Did

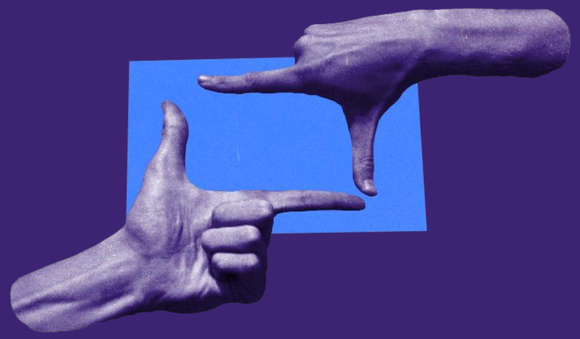

Opportunities

Segments

Solutions

Samples

Business Outcomes

To enhance wallet share from existing customers and also drive word of mouth to attract new customers

Increasing engagement to boost utilization of paid services and positive word of mouth

The key elements: customer context, functional needs, emotional associations and behavioural barriers

Multiple approaches to the truth

1

Quantitative Insights

15,00,000 customers Records

3 Years Time Span

Driving Behaviour Cohorts using transaction data, big data

2

Qualitative Insights

Phenomenological in-depth interactions for episodic recall, context & heuristics: 19 Interactions, 50 hours of interview transcripts

3

Consumer Neuroscience Based Widespan Assessment

500,000 customers, 230+ respondents

Attitude to money & wealth, emotional attributes & salience, identity & aspirations

Client Background

Business Outcomes

We drove insights into:

What is the friction keeping customers from engaging with the program

How do customers perceive current experiences

What experiences do they seek

What are the heuristics and biases which are impacting their decisions

What are the emotional associations customers have with the bank

Client Background

Challenge

Objective

What We Did

Opportunities

Segments

Solutions

Samples

Business Outcomes

Insights from:

Consumer Neuroscience

Uncovering the non-conscious emotional associations, perceptions and attitudes towards the privilege banking program

Identifying attributes with high salience for the customers

Quantitative & Qualitative Data

Enterprise & big data to identify behaviour cohorts

In depth conversation and widespan survey to understand the past experiences of the customers

Behaviour Science

Identifying the friction, heuristics and biases leading to low program utilisation

Forming the context:

Customers have varying expectations from a privilege program and a privilege banking program

Emotional needs:
Differing needs based on which different attributes are more salient for different customers

Functional needs:
Basic banking needs which were table-stakes and common for all customers

For the affluent customer, the emotional needs drive the perception and engagement

Client Background

Samples

Business Outcomes

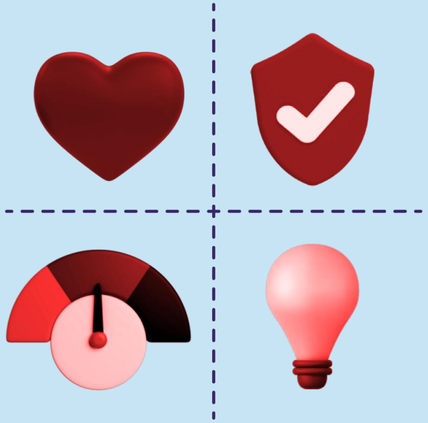

There was a experience-expectation and value gap between what the bank thought and what the customers wanted and perceived

- Customers expected the program to boost their identity and have offerings that help them grow their money

Multiple touchpoints failed specifically in service recovery – *when the going was good, it was good. When there is a problem, nobody knows how to recover.*

Business Outcomes

The functional segments were not delivering growth.

Experiential segmentation

5 new different experiential segments. These were different than the 3 functional segments created by the bank. The offerings had the potential to be positioned according to the experiences they can lead to, rather than by their features, performance attributes or functional benefits

- ⭐ **Self Made Tycoon**
- ⭐ **PSB Migrant**
- ⭐ **Emerging Professionals**
- ⭐ **Mature Professionals**
- ⭐ **Steel Grey**

Business Outcomes

Experiential segmentation

Segmentation was created based on the salience of the following engagement pillars as identified by our insights methodologies

Functional

The core offering of banking and financial services

Identity

How do others perceive me when they see me using this brand, how do I feel?

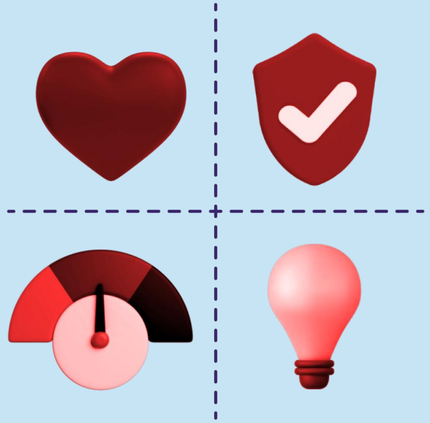

Social

Do other people who use this brand belong to the “tribe” I aspire to

Emotional

How does being a customer of this brand make me feel
