trunorth

From Promoters to Buyers

Is NPS 1.0 enough?

Uncover the behaviour that drives recommendation:

- Context of the customers
- Friction experienced
- Biases affecting their ratings
- Emotions of the customers

trunorth goes beyond traditional NPS to transform your customer engagement.
Creating new behaviours for sustained recommendation.

THE PROMISE OF TRUNORTH

THE NEXT GENERATION OF NPS

A consumer neuroscience based “Out-of-the-box” solution that provides

Unbiased propensity to recommend

Engagement friction that prevents recommendations

Contextual Insights into drivers of friction

Implementable actionable plans

CUSTOMER SHIFTS

- NEW definitions of what constitutes value
- *Emotional associations and Ease* will be key decision drivers
- *Decision fatigue* will cause customers to become less forgiving
- Customers will actively *avoid effortful brands* and complex transactions

WHAT THIS MEANS FOR YOU

Metrics (NPS, CSAT) must directly link to revenue/profitability outcomes

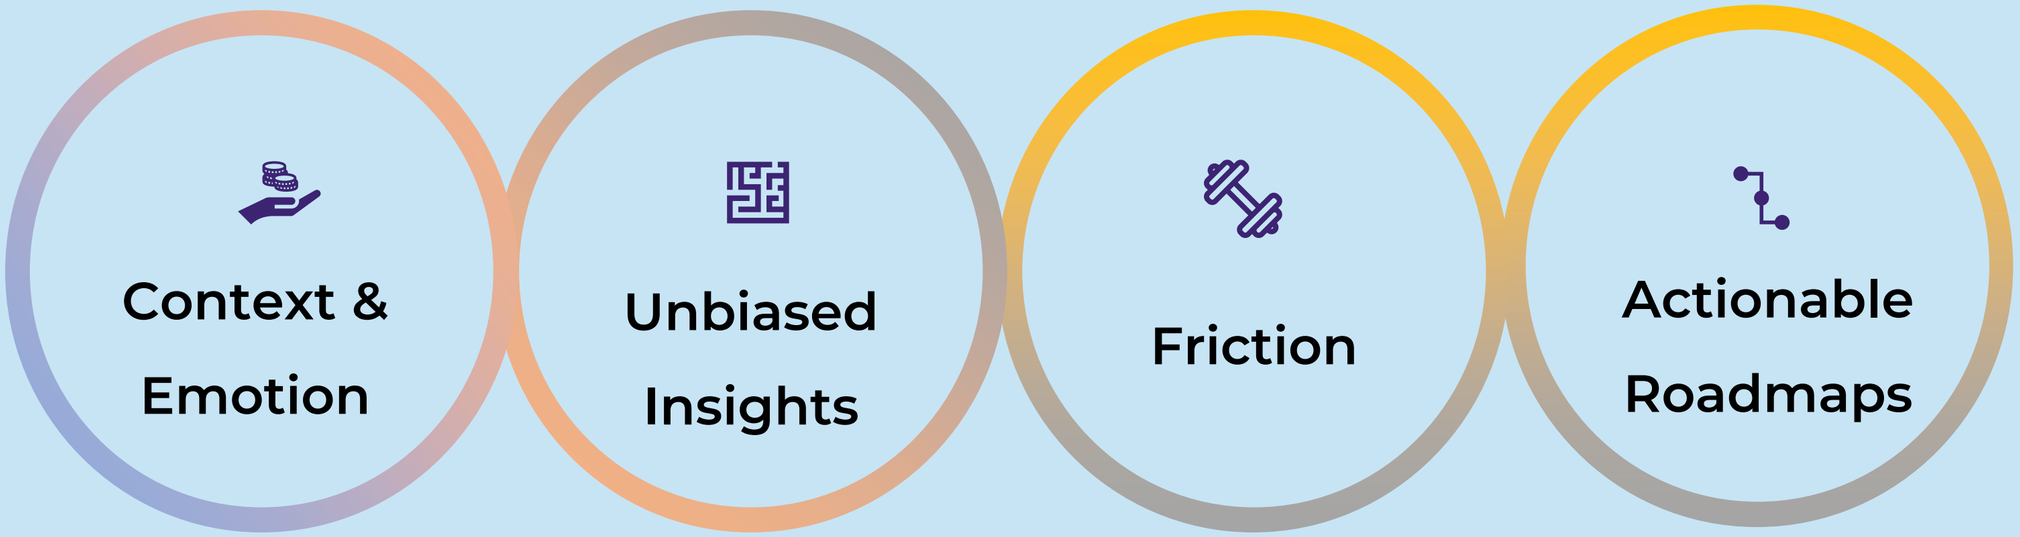

Metrics must give operational roadmaps, not just strategic indicators

Assessment frameworks should include lagging AND leading indices of performance

WHAT IS MISSING IN NPS 1.0

HOW?

trunorth probe

In case of an existing legacy NPS

Configure **trunorth**

Release to **customers** → **trunorth** insights

Can be released to the entire customer base, in multilingual mode. No sampling restrictions

Action plans

trunorth

Probe

A deep probe into your current NPS program covering

- Alignment to business outcomes
- Inherent Bias in NPS assessment questionnaire
- Effectiveness of frequency of NPS assessment
- Effectiveness of schedule of administration (Time of Day, Day of Week, Day of Month) of NPS assessment
- Effectiveness of scoring & benchmarking

Based on Behaviour Science Principles as applied to your specific industry

LACK OF CONTEXT

3. How will you rate the Advisor on knowledge of product and services as offered to you during the sales process?

Not At All knowledgable									Extremely knowledgeable
1	2	3	4	5	6	7	8	9	10

In what context does the customer seek the advisor's input?
- As an influencer?
- As an information provider?
- As an insurance expert?
- As an investment expert?
- As a portfolio management expert?

Who are the 18% customers who found the advisor extremely knowledgeable? Why?

This question fails to take into account customer contexts

Terragni Consulting

LACK OF ACTIONABILITY

2. How well Our Products Meet Your needs?

Not at all									Fully Meet Needs
1	2	3	4	5	6	7	8	9	10

What need exactly did the customer have that our products do not meet?

Where do they now see the gap?

What is the real problem to fix?
- Product design?
- Service around the product?
- Explaining the product to the customer?
- Explaining the policies to the customer?
- Communication?
- Making sure we sell the right product?

This question fails the specificity check and does not provide actionability

Terragni Consulting

SUBJECTIVITY, BIAS IN QUESTIONS

6. How satisfied were you with the attention and empathy displayed by the Customer Care Executive while interacting with you?

Not At All Satisfied									Extremely Satisfied
1	2	3	4	5	6	7	8	9	10

This question fails the bias check

"Satisfaction", "Empathy" and "Attention" are subjective concepts.

What passes as satisfactory attention for one may feel like inattentiveness to another and excessive attention to a third.

Moreover, a person can appear attentive yet demonstrate little empathy

A response on this question is therefore:
- Subjective
- Bias Ridden
- Lacks actionability

trunorth NPS

Effort Dimensions

PHYSICAL	TIME	COGNITIVE
-4.7	-1.2	2.4
ENABLER	INERT	STRENUOUS

1.6
STRENUOUS

This phase is perceived as "strenuous" on the Cognitive aspect. Understanding the *Loan terms & conditions* and their *implications* is perceived to be "complicated" & "difficult"

SAMPLE

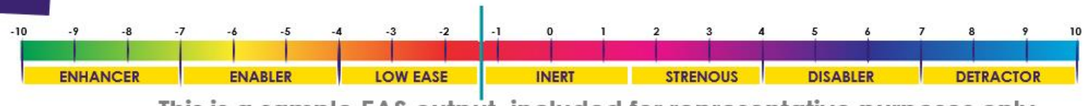

Expectation vs **Reality**

Up to 2 days
to get all necessary information

69%
Required more than 2 days

PRIVATE AND CONFIDENTIAL

Our Recommendations

- Cognitive Effort reduction across 8 regions for all 9 processes
- Form Filling process for all regions except America and the digital journey needs a simplicity and ease focus
- Appointment scheduling process across all regions, for the entire digital journey and the contact centre touch point needs alignment
- Re-map the Enquiry process for all regions, for the contact centre and the website
- Passport receipt process for all regions except Africa, with a specific focus on Cognitive Effort reduction
